SUMMARY

Data Analyst in Business Intelligence with expertise in SQL, Power BI, and Python for end to end dashboard development. Transformed complex real world datasets into executive level visual insights, delivering an Insurance Analytics Dashboard that tracked \$6.7 Cr in premiums and a 106.44% loss ratio. Applied analytical, problem solving and communication skills to data modeling, DAX based KPI reporting, and Power Query transformations, supporting informed decision making.

SKILLS

Data Analysis & Visualization: Power BI, Multi page Dashboards, KPI Cards, Drill through, Slicers, ArcGIS Maps, Data Storytelling, Microsoft Excel

Data Querying & Databases: SQL (Joins, Subqueries, Window Functions, CTEs, Aggregations), MySQL, Relational Databases, Table Relationships

Programming & Libraries: Python, Pandas, NumPy

Data Transformation & Modeling: Data Cleaning, Transformation, Modeling, Power Query, KPI Design

DAX & Advanced Analytics: DAX (CALCULATE, FILTER, AVERAGEX, RANKX)

Tools & Version Control: GitHub

PROJECTS

Insurance Analytics Dashboard May 2026

- Designed a professional 4 page Power BI report — Executive Overview, Claims Efficiency & Risk, Agent Performance, and Risk & Retention — analyzing an end to end insurance business dataset covering premiums, claims, agents, and regional risk across multiple policy types (Health, Motor, Life, Travel, Home).
- Built KPI cards tracking Total Premium (\$6.7Cr), Total Claims (\$0.3Cr), Loss Ratio (106.44%), and 6,018 Active Policies; performed in depth claims analysis across 4,000 records with 54.8% approval rate, 13.79 avg settlement days, and breakdown by claim status and policy type.
- Applied RANKX for top/bottom 10 agent analysis; integrated ArcGIS map for regional loss ratio across global regions; built 2022–2025 premium trend lines with cross page slicers, drill through navigation, and premium vs claims regional comparison charts.

SQL Data Analysis – Case Studies Jan 2024 – Dec 2025

- Solved 20+ real world business SQL problems using multi table JOINS, correlated subqueries, CTEs, and window functions (RANK, ROW_NUMBER, LAG, LEAD) on sales, customer, and operational datasets.
- Published all case studies on GitHub as a structured public portfolio — each with a business problem statement, optimized query, and result interpretation — demonstrating analytical depth to recruiters.

HR Analytics Dashboard May 2025

- Built an interactive workforce dashboard analyzing employee salary and headcount across 5+ departments using DAX (CALCULATE, AVERAGEX, FILTER) on a normalized multi table relational data model with established cross table relationships.
- Developed 4 KPI cards — Total Salary, Average Salary, Employee Count, Salary Distribution — with department wise charts, time based salary trends, and dynamic slicers enabling self service analytics for non technical stakeholders.

EDUCATION

A1 Global Institute of Engineering and Technology Telangana
B.Tech – Computer Science / IT Sep 2022 – Present

- CGPA: 7.x / 10

Sri Sai Krishna Junior College Sep 2020 – May 2022
Intermediate (MPC)

- MARKS: 690/1000

CERTIFICATIONS

- Power BI for Beginners: Simplilearn (Microsoft) May 2026 Certificate Code: 10209616
